

# M.O.A TARGET 100 YARDS

INSTRUCTIONS

SCAN ME

Windage and elevation adjustments are listed in Minutes of Angle (MOA) for 100 yards. If the dot below represented where your bullets were impacting, you would need to adjust Right 1 MOA and Down 3 MOA in order to impact the middle of the diamond.

You should always shoot at least 3 shots and correct off of the center of the group. The small circles represent 1, 2, and 3 MOA for group measurement.
