

M.O.A TARGET 25 YARDS

INSTRUCTIONS

SCAN ME

Windage and elevation adjustments are listed in Minutes of Angle (MOA) for 25 yards.
If the dot below represented where your bullets were impacting, you would need to adjust Right 4 MOA and Down 12 MOA in order to impact the middle of the diamond.

This target has a rectangle which represents our 100 yard target at 100 yards. When aiming at the diamond, your bullets should impact in the rectangle (ideally about an inch low of the diamond) in order to be on target at 100 yards.
