

MRAD TARGET 100 METERS

Windage and elevation adjustments are listed in Milliradians (MILs) for 100 meters.

If the dot below represented where your bullets were impacting, you would need to adjust Right 0.4 MILs and Down 1 MIL in order to impact the middle of the diamond.

You should always shoot at least 3 shots and correct off of the center of the group. The small circles represent 1, 2, and 3

MOA for group measurement.
