

SCOPE TRACKING MIL 100 METERS

This target is designed to help you practice making proper adjustments while shooting and can also confirm your scope's adjustments. To use this target: Aim ONLY at the diamond throughout the drill. Adjust your scope so that your bullet impacts on the 1 while aiming at the diamond. After shooting, adjust your scope back to "zero" and then adjust it so that your bullet impacts on the 2 while aiming at the diamond. After shooting the 2, continue moving your scope back to "zero" and make adjustments for shots 3 and 4 to impact on the 3 and 4. For your final and 5th shot, adjust back to "zero" and shoot a bullet into the diamond.
